

**Attention: Hunters, Woodlot Owners,
Loggers, Contractors, and Farmers**

**Highly attractive
to DEER, WILD
TURKEY, GEESE, AND
LIVESTOCK**

Wildlife Seed Mix **from SAM and Maine Seed Co.**

Contains highly nutritious cool season perennial grasses and clovers

**Use on food plots, near deer yards, logging roads and landings, pastures,
construction sites**

- **Adaptable to a wide array of site and soil conditions**
- **Cost effective. Small seed size broadcasts at only 25 lbs per acre**
- **Plantings last several years with minimal maintenance**
- **More wildlife-friendly than “conservation mixes”**
- **Provides superior deer nutrition immediately before and after the winter yarding season**
- **Grasses remain green and highly palatable into late fall/early winter, even under snow**
- **Contains 5X the clover than in “conservation mixes”**
- **White and red clovers attract wildlife over most of the growing season**

SAM's Wildlife Mix contains

- 20% Festuoulium (Duo)
- 20% Meadow Fescue (Preval)
- 15% Perennial Ryegrass (Power Forage)
- 10% Orchardgrass (Tekapo)
- 10% Kentucky Bluegrass (Troy Forage)
- 5% Italian Ryegrass [tetraploid annual] (Feast 2)
- 5% Italian Ryegrass [diploid annual] (Thunder)
- 10% Medium Red Clover (StarFire 2)
- 5% Ladino White Clover (Jumbo 2)

Site Prep and Seeding

- Till or drag site to expose soil
- Stand quality is best at PH 5.5 to 7.0
- Broadcast seed at 25 lbs per acre using properly calibrated Cyclone-type seeder
- 50 lbs bag sows 2 acres; 10 lbs sows 2/5 acre (100 ft. x 170 ft.)
- Lightly cover seed by dragging, tracking, or packing. Good soil contact is **essential** to good germination.
- Use shredded mulch hay sparingly, if at all
- Annual mowing or bushhogging in late August of September helps maintain the stand.

SAM's Wildlife Mix is

**provided by
Maine Seed Co., Wales, ME**

SAM's Wildlife Seed is distributed and sold exclusively by The Sportsman's Alliance of Maine, 205 Church Hill Rd., Augusta, ME 04330. (207) 623-4589 www.sportsmansallianceofmaine.org
